SUBJECT: Computer Matching Bill

1. Thank you for your memorandum of 8 October 1986 concerning the subject legislation. As I mentioned, we have discussed this bill with representatives of the FBI, DEA, and Secret Service and it appears as if these agencies will seek a law enforcement exemption.

2. We strongly support your view that this bill would adversely impact on the operations of this Agency. In particular, your observation that "this Agency cannot be put in a position of having to disclose to an individual the fact that we have requested information on that individual without compromising the particular intelligence operation underway" is well taken.

3. Last, your proposed amendment (§5 of OCA 86-2999) appears to resolve the problem very nicely.
